DETAILED ACTION

The request filed on 9/27/01 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/510,332 is acceptable and a CPA has been established. An action on the CPA follows.

1. Election/Restriction

A. Restriction to one of the following inventions is required under 35 U.S.C. 121:

1-72. Claims 94-100 are drawn to 72 distinct isolated nucleic acid molecules (SEQ ID NOs) as well as vectors and host cells, classified in class 435, subclass 69.1.

B. The inventions are distinct, each from each other because of the following reasons:

Inventions 1-72 are independent and distinct, each from each other, because they are products which possess characteristic differences in structure and function and each has an independent utility that is distinct for each invention which cannot be exchanged. Applicants must elect one of the independent SEQ ID NOs in claim 94 and its corresponding protein sequence as recited in claim 97.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Art Unit: 1647

C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
